

MRSA/Staph

Home Disinfection Information

Are you concerned about the safety of your family and pets while using household disinfectants for MRSA or staph and general germ control in your home?

It is very important that you use a disinfectant that is strong enough to kill bacteria and viruses but safe for your family and pets without damaging your household belongings.

Protecting your home from viruses and bacteria on surfaces is a critical component of proper hygiene. MRSA and Staph bacteria can live for days, if not weeks, on countertops, door knobs, toys, pet crates, sports equipment, TV remotes, etc. If you don't kill the bacteria in your home, the infection will continue to spread from one family member or pet to the next. We recommend daily use of PureGreen24 on all of these high touch points as the best practice for disinfection.

Cleaning agents are for removing dirt and keeping things "clean," whereas disinfectants are for killing harmful bacteria that live on surfaces in your home or office. Most household cleaners and sanitizers are not only ineffective at killing MRSA and Staph bacteria, they also may make you more prone to getting infected in the long run due to anti-bacterial resistance. Continual exposure to the toxic chemicals found in most disinfectants, sanitizers and cleaners weakens your immune system, leaving you more prone to recurring infections.

There is a big difference between a sanitizer and a disinfectant; they should not be confused. A sanitizer only reduces bacteria. A disinfectant kills bacteria, such as PureGreen24. Use a disinfectant that is specifically formulated to kill 100% of MRSA and Staph bacteria. It is imperative that you have a complete kill; otherwise the bacteria will continue to reproduce and may spread to other family members and pets.

The most common active ingredient in disinfectants on the market is the toxic ammonium chloride or diluted bleach. MRSA and Staph kill claims only apply with these toxic chemicals when used in high enough concentrations.

Ammonium Chloride & Bleach have the following negatives:

- Documented to be toxic
- Skin contact is to be avoided; harmful if absorbed through skin
- The product shouldn't be used on children's toys, sports equipment, pet crates or any surface that has skin contact without rinsing
- Caustic; may damage plastics, fabrics, vinyl and certain metals.
- Harsh fumes
- Protective gear should be used
- Dangerous and hazardous to use around children or pets

The EPA requires the following statement on all labels containing **Ammonium Chloride & Bleach** in high enough concentrations to kill MRSA and Staph:

Precautionary Statements on EPA label:

Hazards to Humans and Domestic Animals

Caution: Harmful if inhaled or absorbed through skin.

Avoid breathing vapor and contact with eyes skin or clothing.

PureGreen24 kills MRSA and the most deadly of superbugs, yet also kills everyday household germs. PureGreen24 is non-toxic and effective.

PureGreen24 Advantages Include:

- **24 Residual Protection***
- Contains no toxic chemicals; non of the ingredients in PureGreen24 are on the California list of toxic chemicals (CA Proposition 65)
- Kills Germs in 30 Seconds
- EPA registered for use on children's toys and sports equipment
- No rinsing required for Skin contact
- Odorless
- Non-Staining Non-Bleaching
- No protective gear required

PureGreen24 Has **NO** Precautionary Statements on the EPA label

Pure Green, LLC is the international distributor of PureGreen24 disinfectant and deodorizer; your only choice for a proven disinfectant. Pure Green, LLC is dedicated to reducing health risks caused by exposure to viruses, fungi and bacteria without endangering humans and animals during the disinfecting process. PureGreen24 kills MRSA, Staph, & Influenza A, yet also kills common household germs and is EPA registered for use in the presence of children and animals. PureGreen24 is based on a patented Silver Ion SDC technology, a patented disinfectant with 24hour effectiveness. Pure Green, LLC is further distinguished by donating a percentage of profits to charities which support children's health, cancer research and animal protection. Additional information about Pure Green, LLC is available at www.PureGreen24.com.
